Student Career Path App

Helping Students Choose and Achieve Their Career Goals

+
•
0

Introduction

- Our team aims to develop an app designed to help students discover and pursue their ideal career paths from an early age. It will provide personalized guidance, helping students explore careers, set goals, and access the resources needed to achieve them. The app leverages NPC labor force datasets to measure salary expectations and job demand for each career, ensuring students make informed decisions about their future.

The Problem we are trying to solve:

- Many students struggle to decide their career paths until a later stage in their education which often delays their progress or prevents them from achieving their goals. Our survey revealed that most students make career decisions during high school or university, missing the opportunity to prepare earlier and build productive habits early on.

Proposed Solution

- We propose an app that guides students in identifying their career interests early. The app provides:
 - an AI model which interacts with the NPC labor force dataset to make it accurate.
 - gamified career path system.
 - Progress tracking.
 - Resources to build necessary skills.
- 

App Design

Impact

01

OUR APP WILL
ENCOURAGE
STUDENTS TO
BUILD PRODUCTIVE
HABITS AND SET
CLEAR GOALS.

02

EXPLORE CAREER
PATHS ALIGNED
WITH THEIR SKILLS.

03

START PREPARING
FOR THEIR FUTURE
CAREERS EARLY.

04

MAKE INFORMED
EDUCATIONAL AND
CAREER DECISIONS

05

BOOST
PRODUCTIVITY
ACROSS ALL WORK
SECTORS AT A
NOTABLE RATE

Conclusion and Next Steps

Next steps include:

- Finalizing app development.

- Conducting user testing.

- Partnering with schools for early adoption.

- Enhancing features based on user feedback.
